# GOLD Label Zn

# AT PLANTING – EARLY SEASON

**GOLD Label Zn** is a clean nutrient solution designed for use as a starter on various agricultural crops to aid in plant development. It contains humic substances derived from Leonardite to increase the availability of mineral nutrients and to condition the soil. **GOLD Label Zn** is designed for use in all soil types and should be concentrated for maximum response.

- Improves phosphorus efficiency.
- Makes soil more responsive and improves CEC.
- Improves soil to crop interaction.
- Contains potassium acetate.
- Both poly- and orthophosphate.
- Helps maintain phosphorous:zinc balance in soil.

**6-16-4**
