MATRIXX

TOBACCO SUCKER CONTROL

TAKE YOUR SUCKER CONTROL TO THE NEXT LEVEL

Adding **MATRIXX** to your existing contact sucker control program improves performance by killing more hard-to-reach suckers in the top of the plant. This enhances the run down of the spray solution, achieving better and more thorough contact with suckers.

MATRIXX improves starting control an average of 1.8 stalk positions.

Use rate: 4 oz./acre

- Safe and Effective
- Easy to Use
- Proven Performance
