Green Tac

Contact Sucker Control From Natural Sources

Sucker Control from Natural Sources

Green Tac is a contact sucker control made from natural sources for the control of sucker growth on Burley, Flue-Cured, Dark, Maryland, and Cigar Tobacco.

Features & Benefits:

- Made from natural source active ingredients.
- Carefully balanced combination of natural active ingredients, emulsifiers and wetting agents formulated for excellent sucker control and crop safety.
- Effective when it comes in direct contact with suckers.
- May be used in PRC and organic tobacco production.

Application:

- The concentrated product is diluted with water to form a creamy emulsion which is then applied as a coarse spray.
- The emulsion should be applied so that maximum contact is made with the suckers.
- Start at 30%-40% button stage. Apply Green Tac at a 4% concentration (4% concentration = 2 gallons Green Tac in 48 gallons of water).
- Apply Green Tac every 3-5 days at a 5% concentration until tip leaves reach adequate size for a systemic application. (Tip leaves 16-18 inches.) (5% concentration = 2.5 gallons **Green Tac** in 47.5 gallons water).
