GENERAL INFORMATION

CarboMaxx DG is a uniform granule which utilizes proprietary dispersible granule (DG) technology. Each granule will disperse into thousands of particles with irrigation or rainfall, facilitating incorporation of the product into the soil. The hard granule has a low moisture and dust content, allowing it to be easily blended with other components, such as urea-based or dry-blend fertilizers.

Humic acid products, such as **CarboMaxx DG,** may increase or enhance nutrient uptake while improving and replenishing depleted soils.
