COVERALL

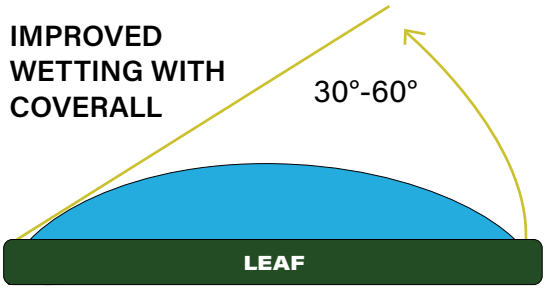

For All Spray Tank Applications

COVERALL is a 100% low-foam nonionic surfactant for use in plant spray mixes to improve the effectiveness of insecticides, herbicides, fungicides and defoliants. It provides exceptional wetting and spreading, and aids in the deposit of more uniform coverage while minimizing runoff.

COVERALL (at 0.25%) **on a cotton leaf mixed with water (left side) vs. water alone (right).**

- Lower use rates than industry standard (80/20 surfactants).
- Delivers 10x spreading of 80/20 surfactants.
- Improves spray performance by enhancing coverage.
- More active ingredient in contact with your target.
- Designed for applications where water volumes range from 15-25 gallons/acre.
