Impact F

GREENHOUSE TOBACCO

IMPACT BIOLOGICAL FOR TOBACCO

Impact F in Greenhouse or Transplant Water

Greenhouse Plant Bed: Use 4-6 oz. per 100 gallons of plant bed water 1-2 weeks after emergence, then 8-10 oz. per 100 gallons of plant bed water 7-10 days before transplanting.

When applying to greenhouse water, do not apply with fungicide. **Impact F** should be evenly distributed throughout plant bed. Can be applied with soluble fertilizers.

Transplant Water: 1-2 qts. per 100 gallons.

For maximum benefit, apply 1-2 qts. per acre of **Impact F** at lay-by.

****See Foliar Tobacco Program.***

Benefits:

- Improve chemical and fertilizer efficiency.
- Increased plant photosynthesis.
- Increased plant health – greater disease resistance (SAR elicitor materials).
- Root development.
- Quicker establishment after transplant.
