Revelin

Locally Systemic Control for Your Tobacco Program

Revelin is a locally systemic plant growth regulator for the control of sucker growth in Burley, Cigar, Dark, Flue-Cured and Maryland tobacco.

Features & Benefits

- Contains 1.2 pounds of Flumetralin per gallon.
- Can be used in coarse spray applications or as run down application.
- Can be integrated into a systemic portion of your sucker control program.
- Rainfast within 2 hours of application.
- Approved for split application and can provide improved sucker control when done so. (See label for details.)
- No plant back restrictions when used at labeled rates (do not allow excessive runoff onto the soil).

Always read and follow the label instructions on the product container(s) before using.

Active Ingredient:
Flumetralin 13.7%
Other ingredients 86.3%
(1.2 pounds Flumetralin per gallon.)
