ADVANCE LCO

The Best of Both Worlds

For a Stronger, Healthier Crop from the Roots Up

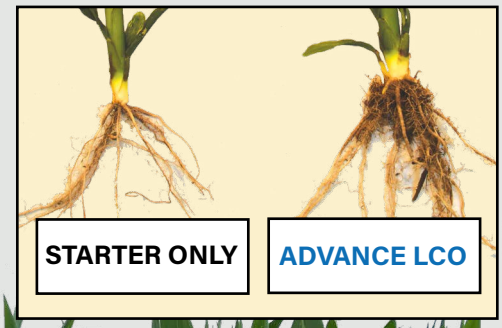

Advance LCO is a proprietary composition of natural carboxylic acids secreted by soil bacteria, fungi, plant roots and **LCO Promoter Technology®**. These natural acids enhance microbial growth and function by controlling the processes that facilitate nutrient availability, uptake, and assimilation.Lipo-chitooligosaccaharide (LCO) is a signal molecule that promotes lateral root growth.

• **Advance LCO** combines the nutritional advantages of **Advance Concentrate** with the power of **LCO Promoter Technology®**.

• **Advance LCO** is a natural material mimicking the way nature solubilizes nutrients for absorption and uptake.

See the ADVANTAGE above and below ground

- Easy, flexible application.
- Can be mixed with starter or nutrient solutions.
- Enhanced root and shoot development for improved nutrient and water uptake.
- Improved plant health enables plants to better handle environmental pressures.
- Contains **LCO Promoter Technology®** and no complexed metals.
- Solubilizes nutrients making Phosphorus, Potassium, Calcium, Magnesium, Manganese, Molybdenum, Iron, and Sulfur more available to plants.
