

# Post Harvest Burndown

Weeds don't take time off ...Neither Can You!

## A post harvest burndown:

- \* Reduces seed bank in the following crop
- \* Reduces weed population in next crop
- \* Helps fight resistance
- \* Makes weed management easier and less costly

Taken: 9/3/2015  
Five days after Gramoxone application  
behind corn harvest

Taken: 6/15/2016  
Same field—behind wheat  
harvested 6/13/2016

The battle of weed control is a numbers game. Reduce the weeds and eliminate the seed to win the war. This has to be a year-round battle because weeds do not take time off.

## Cleaner Fields Improve Yields

### Keys to Post Harvest Burndown:

- ◆ Be timely after harvest
- ◆ Use a good burn down material
- ◆ Add a residual or come back in late fall with residual material
- ◆ Use Spectrum in your burndown program
