Chem-Oil 83

Superior Blend for Superior Performance

Chem-Oil 83 is a high-quality blend of superior paraffinic oil, emulsifiers, and surfactants. An excellent penetrator, **Chem-Oil 83** increases pesticide activity and is especially effective in post-emergence herbicide and desiccant/defoliant sprays. It can also enhance pesticide performance.

- Enhances penetration of spray mixtures.
- For use with pesticide sprays and non-selective herbicides.
- May be used in preemerge no-till, post-emerge over-the-top and post-directed applications.
- Recommended for use with defoliants and herbicides used for desiccation/defoliation.
- May be used with defoliants to improve penetration and can enhance leaf drop.
