ChemWett Plus

Increase Surface Activity, Penetration

ChemWett Plus general purpose, low-foam nonionic spray adjuvant. It increases the surface activity of spray mixes and aids in penetration.

Benefits:

- Improves effectiveness of insecticides, herbicides, fungicides, and defoliants.
- Increases surface activity of spray mixtures by improving the wetting and spreading characteristcs of spray mixtures.
- Aids in deposit of a more uniform coverage while minimizing runoff.

The industry standard in 80/20 sufactants.

ChemWett Plus reduces surface tension and allows better coverage for spray mixes.
