GOLD SHOT 4–10–2

Start off with a BANG!

GOLD SHOT 4-10-2 is designed for use as an in-furrow starter on corn and small grain cereal crops – as well as use on potatoes and vegetable crops – to aid in plant development by increasing the availability of mineral nutrients and to condition the soil.

- Contains humic substances and simple sugar complexes.
- Compatible with most crop protection products and fertilizers.
- Designed for use in all soil types. *Should be concentrated for maximum response.*
- Complete micronutrient package for a better start.
- May be used with a variety of agricultural crops, but is specifically designed for use in corn, small grain crops, potatoes, and vegetable crops.

A test for compatibility is recommended prior to large-scale mixing.
