Increased Nitrogen Efficiency

N-Rage is a nitrogen management aid that reduces nitrogen loss while increasing nitrogen availability and uptake. It contains calcium nano-polymers designed to work with urea, UAN solutions and animal wastes to stabilize nitrogen. **N-Rage** is designed to reduce nitrogen leaching and volatilization while increasing surface area allowing for more nitrogen to bond to the soil. **N-Rage** helps you manage nitrogen during key plant growth stages.

- Increases nitrogen availability and uptake.
- For use on ALL crops.
- Reduces nitrogen loss from leaching, volatilization, and denitrification.
- No detrimemtal effects on soil.
- Reduces livestock manure odor.
- Manages nitrogen availability during key growth stages.

RATE SELECTION CHART	MATERIAL	Urea	UAN Solutions	Liquid Manure	Dry Litter	Poultry House
	RATE	2-3 qts./ton	1-2 qts./ton	1 qt./acre	1 qt./acre	1 qt./2500 sq. ft.
