The **BulkFlow** Peanut Planter

Precision Planting® | Premier Dealer

HARVEST INTERNATIONAL INC

Precision Starts Before the Seed Reaches the Soil.
Our innovative sectional gravity-fed bulk fill hopper and seed conveyor redefine seed handling. Engineered to minimize impact and maximize protection, the system delivers a smooth, controlled seed flow that helps preserve seed quality throughout the planting process. Less seed damage. Greater planting precision. More confidence in every acre. Because protecting yield starts with protecting every seed.

Available Configurations:

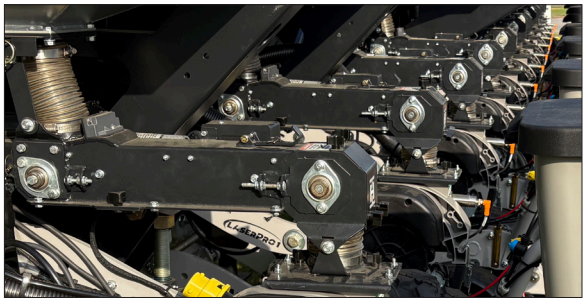

Rigid Bars
- 6R36
- 6R38
- 8R30

*Hopper Options:
48 bushel / 102 bushel

Stacker Bars
- 12R36
- 12R38
- 16R30

*Hopper Option:
96 bushel

The Advantage is Built in

- **Increased Seed Capacity** – Plant longer with fewer refill stops.
- **Reduced Seed Damage** – Gravity-fed seed handling protects seed quality from hopper to furrow.
- **Precision Singulation** – Consistent seed spacing for improved emergence and stand uniformity.
- **Higher Planting Speeds** – Cover more acres without sacrificing planting accuracy.
- **Lower Hydraulic Requirements** – Efficient operation with reduced demand on your tractor's hydraulic system.
- **Advanced Row-by-Row Technology** – Real-time control and monitoring for maximum planting precision.

More Capacity. More Precision. More Performance.
