When it Just HAS to Stick.

CoFilm is a superior nonionic extender/sticker product designed to extend the life of agricultural crop protection and nutritional products. Utilizing terpene-polymer technology, it is used as a retention aid and sticker. **CoFilm** is compatible with most commercially used crop protection products and soluble fertilizers.

- Prevents applied materials from washing off foliage due to rain and wind erosion.
- Greatly reduces the effects of crop protection environmental degradation factors.
- Improves deposition and distribution of sprays.
- Aids in pod-shatter reduction at harvest.
- Functions as an anti-transpirant.
- Non-toxic to honeybees.
- Increases cohesion of crop protection and nutritional sprays to the target crop through formation of an expanded terpene-based film.
- Resistant to air, light and moisture penetration, resulting in increased and controlled efficacy of the applied materials.
- Will not clog nozzles, freeze or foam.
- Effective in both ground and aerial applications.

CoFilm forms a flexible polyterpene film.
