Impact F

FOLIAR SOYBEAN

IMPACT BIOLOGICAL FOR SOYBEANS

Impact F is a natural crop health bio-stimulant that reinforces the benefits of existing fertilization and crop protection applications. The bio-stimulant properties of **Impact F** enhace physiological capabilities within the plant, including root development, carbon fixation, disease resistance, flowering fruit set, and other desirable characteristsics.

- Can produce substantial increase in crop production and enhance crop quality.
- Increases plant root system efficiency.
- Supports overall crop health and balanced growth.

4-bean pod stalks.

Program Recommendation:

Use rate: 1-2 qts./acre.

Begin applications of **Impact F** on soybeans just prior to flowering.

Impact F can be mixed with liquid fertilizers and other nutritional products (i.e. **Quantum**, **NutriSol** and **CCS** products from Coastal AgroBusiness), fungicides, insecticides, and herbicides.

Impact F may be reapplied at R_3.

Always read and follow product label instructions.
