Use of **Pre-Vent™** does not replace an approved drift reduction adjuvant (DRA). **Pre-Vent™** is a volatility-reducing agent, but **does NOT fully eliminate all volatility potential. Pre-Vent™ does NOT control drift.** Always follow the precautions, restrictions, recommended use rates, and application directions appearing on the labels for each product to be tank-mixed. While the carrier is agitating, add **Pre-Vent™** to the **spray tank first** during the mixing and filling process.
