EXCEL 2000

OMRI LISTED For Organic Use

Exponential Coverage, Exceptional Performance

EXCEL 2000 is a 100% organo-silicone nonionic wetter, spreader, penetrating adjuvant.

- Enhances pesticide performance through superior coverage, translocation and uptake.
- Gives 40+ times the coverage of water alone when applied at 1/2 pint per 100 gallons of water.
- An excellent fit for blast applications where coverage is critical.
- Exceptional penetration of the plant's waxy cuticle.
- Lowers spray surface tensions to promote stomatal flooding.
- Allows the applicator to choose lower volumes of water per acre (12 gallon/acre or less), which means less tank fill-ups and more acres treated.
- Gives exceptional performance at 1/4 the standard rate of conventional surfactants and 1/2 the standard rate of silicone blend surfactants.

Water alone
1x area covered

Conventional surfactant
5x area covered

Silicone-blend surfactant
25x area covered

EXCEL 2000
40x area covered
