Co-Phite

Enhance Growth and Improve Yields

Co-Phite is a potassium phosphite fertilizer supplement that enhances nutrient availability. It is intended to be used as part of a well-balanced fertility program. **Co-Phite** can be used on a wide variety of crops and may be applied through foliar sprays, root drenches, soil injections, and drip irrigation systems.

Features & Benefits:

- Stimulates plant health during periods of stress.
- Enhances nutrient availability.
- Beneficial to plant growth, transplant establishment, root development, flowering, and fruit maturation.
- Improves nitrogen and carbon assimilation.
- With continued use, a greater response from sequential crops may be observed.
