Coastal AgroBusiness, Inc.

Product Label

Active Ingredients:

Fulvic Acid 5%

Derived from Fulvic acid, Fructose, Glucose,
Sucrose, Maltose, Dextrose, and other Simple Sugars.

NOT FOR HUMAN CONSUMPTION

CAUTION

KEEP OUT OF REACH OF CHILDREN

Do not ingest.
Read the entire label for additional precautionary statements.

Weight per gallon: 9.25 lbs.

SHAKE WELL BEFORE USE

Manufactured By:
Coastal AgroBusiness, Inc.
Greenville, North Carolina

GENERAL INFORMATION

F5 Foliar Sugar Solution is designed for direct field application or as an additive for foliar nutritional applications. **F5 Foliar Sugar Solution** contains fulvic acid and simple sugars that provide a boost of energy in the form of carbohydrates where the plant needs it most, the foliage, while directly improving plant physiology. Fulvic acid is a small, water-soluble molecule from humic substance breakdown. It binds minerals, improving their availability and nutrient transport into plant cells. Fulvic acid also enhances stress tolerance when combined with fertilizers, accelerating deficiency correction, which promotes efficient allocation of plant energy to reproduction and grain fill, thereby enhancing yield. When used with crop protection products, it may improve efficacy by helping active ingredients enter plants faster. Simple sugars, when applied foliarly, may boost beneficial insect populations and help fuel plant processes during periods of high demand or stress. **F5 Foliar Sugar Solution** combines fulvic acid and simple sugars to give the plant the best physiological defense.

Note: This product is compatible with most crop protection and nutritional materials. However, a test for compatibility is recommended prior to large-scale mixing.

PRECAUTIONARY STATEMENTS / HAZARDS TO HUMANS

CAUTION. NOT FOR HUMAN CONSUMPTION. Causes mild skin and serious eye irritation. Avoid contact with eyes, skin, or clothing. Use caution when opening. Avoid breathing vapors or spray mists. Use only with adequate ventilation. Wash thoroughly after handling. Wear eye/face protection. Remove and wash contaminated clothing before reuse. Do not apply this product in a manner as to directly or through drift expose workers or other persons. Always read and follow product labeling.

FIRST AID

If swallowed: Call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person.

If in eyes: Flush eyes with copious amounts of clean water for at least 15 minutes. Remove contacts if present, and easy to do. Do not let the victim rub their eye. Get medical attention.

If on skin: Remove contaminated clothing and wash skin with soap and water. If irritation develops, get medical attention.

If inhaled: Remove the person from the area of exposure. Give artificial respiration if necessary. If breathing is difficult, give oxygen if a qualified operator is available. Seek medical attention.

NOTE: If contact is made with a spray solution containing pesticides, follow the "First Aid" statements on the pesticide label.

STORAGE AND DISPOSAL

Do not store near heat or open flame. Store in original container only. Keep container tightly closed when not in use. Keep from freezing. If damaged or leaking, soak up with absorbent material and

place in a suitable container for disposal. Transfer remaining product to a suitable container for storage and label.

Do not contaminate water, food, or feed by storage or disposal. Do not contaminate water by runoff from equipment wash waters or spray materials. Wastes resulting from this product may be disposed of on-site or at an approved waste disposal facility.

Container Disposal: Triple rinse (or equivalent) and add rinsate to spray tank, then offer for recycling, or puncture and dispose of in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

AGRICULTURAL USE REQUIREMENTS AND USER SAFETY RECOMMENDATIONS

When used in conjunction with pesticides, consult the pesticide manufacturer's label for worker protection recommendations. Use of waterproof gloves and protective eyewear is recommended when handling this product.

DIRECTIONS FOR USE

General use rate: 1 - 4 pints of **F5 Foliar Sugar Solution** per acre, and repeat as needed.

F5 Foliar Sugar Solution may be applied with irrigation water in any irrigation system, alone or with nutrient solutions. **F5 Foliar Sugar Solution** should be added to the water before adding any nutrient solutions or crop protection products. Consult your Coastal AgroBusiness Solutions Advisor for proper mixing order and application rates for your area.

Note: Because of the nature of this product and its ability to substantially reduce spray solution pH, it is recommended that this product not be used in low-volume (high-concentration) applications with fixed copper fungicides or sulfonylurea-based crop protection products.

Always mix well to ensure proper distribution during application

KEEP FROM FREEZING

SHAKE BEFORE USING

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with the directions contained on this label under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. These risks include, but are not limited to, damage to plants, crops, and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury.
