R3PLENISH

R3PLENISH is specifically formulated to be used on soybean and cotton crops. It is a chloride-free, clear liquid solution containing nitrogen, potash, boron and molybdenum. It also contains humectants, growth enhancement compounds, and penetration and translocation aids to enable nutrients to move within the plant system more easily. It may be blended with other fertilizers or applied as a foliar treatment.

- Helps control and manage late-season nitrogen in soybeans and cotton.
- Compatible with most crop protection and nutritional products.
- Convenient and easy to use.
- Plant-preferred source of potash (potassium acetate) for foliar application.
- Promotes crop health and proper fertility for late-season crop management, to enhance yield and quality.
